

AlkynneFi

Socializing Defi to simplify finance

What if we...

saw the dream of
blockchain 10 years ago?

What if we...

**knew that a couple of
chimp pics could make one
millions ?**

**“History doesn't repeat itself, but
it does rhyme.”—(Mark Twain)**

We see the history of the world being nothing
but a fable rhyming to the beats of the one's
being able to recognize and understand the
beat and thus predict and playing to the next
one.

*We know that the new
rhyme is the one played by
blockchain.*

But how do people like **YOU**
and **I** Dance on this
rhythm.eth ?

**THIS IS WHERE
WE COME IN**

What do you think was, hands down, one of the **most successful** models to bridge the gap between someone experienced and public wanting to be in the same.

Yes, The Creator Economy!

Each “Creator” creates precisely what is demanded and henceforth heavily consumed and appreciated by their respective audience, be it academics, entertainment, sports or news thus successfully bridging the

PLPRESENTING TO YOU

AlkynneFi

Socializing Defi to simplify finance

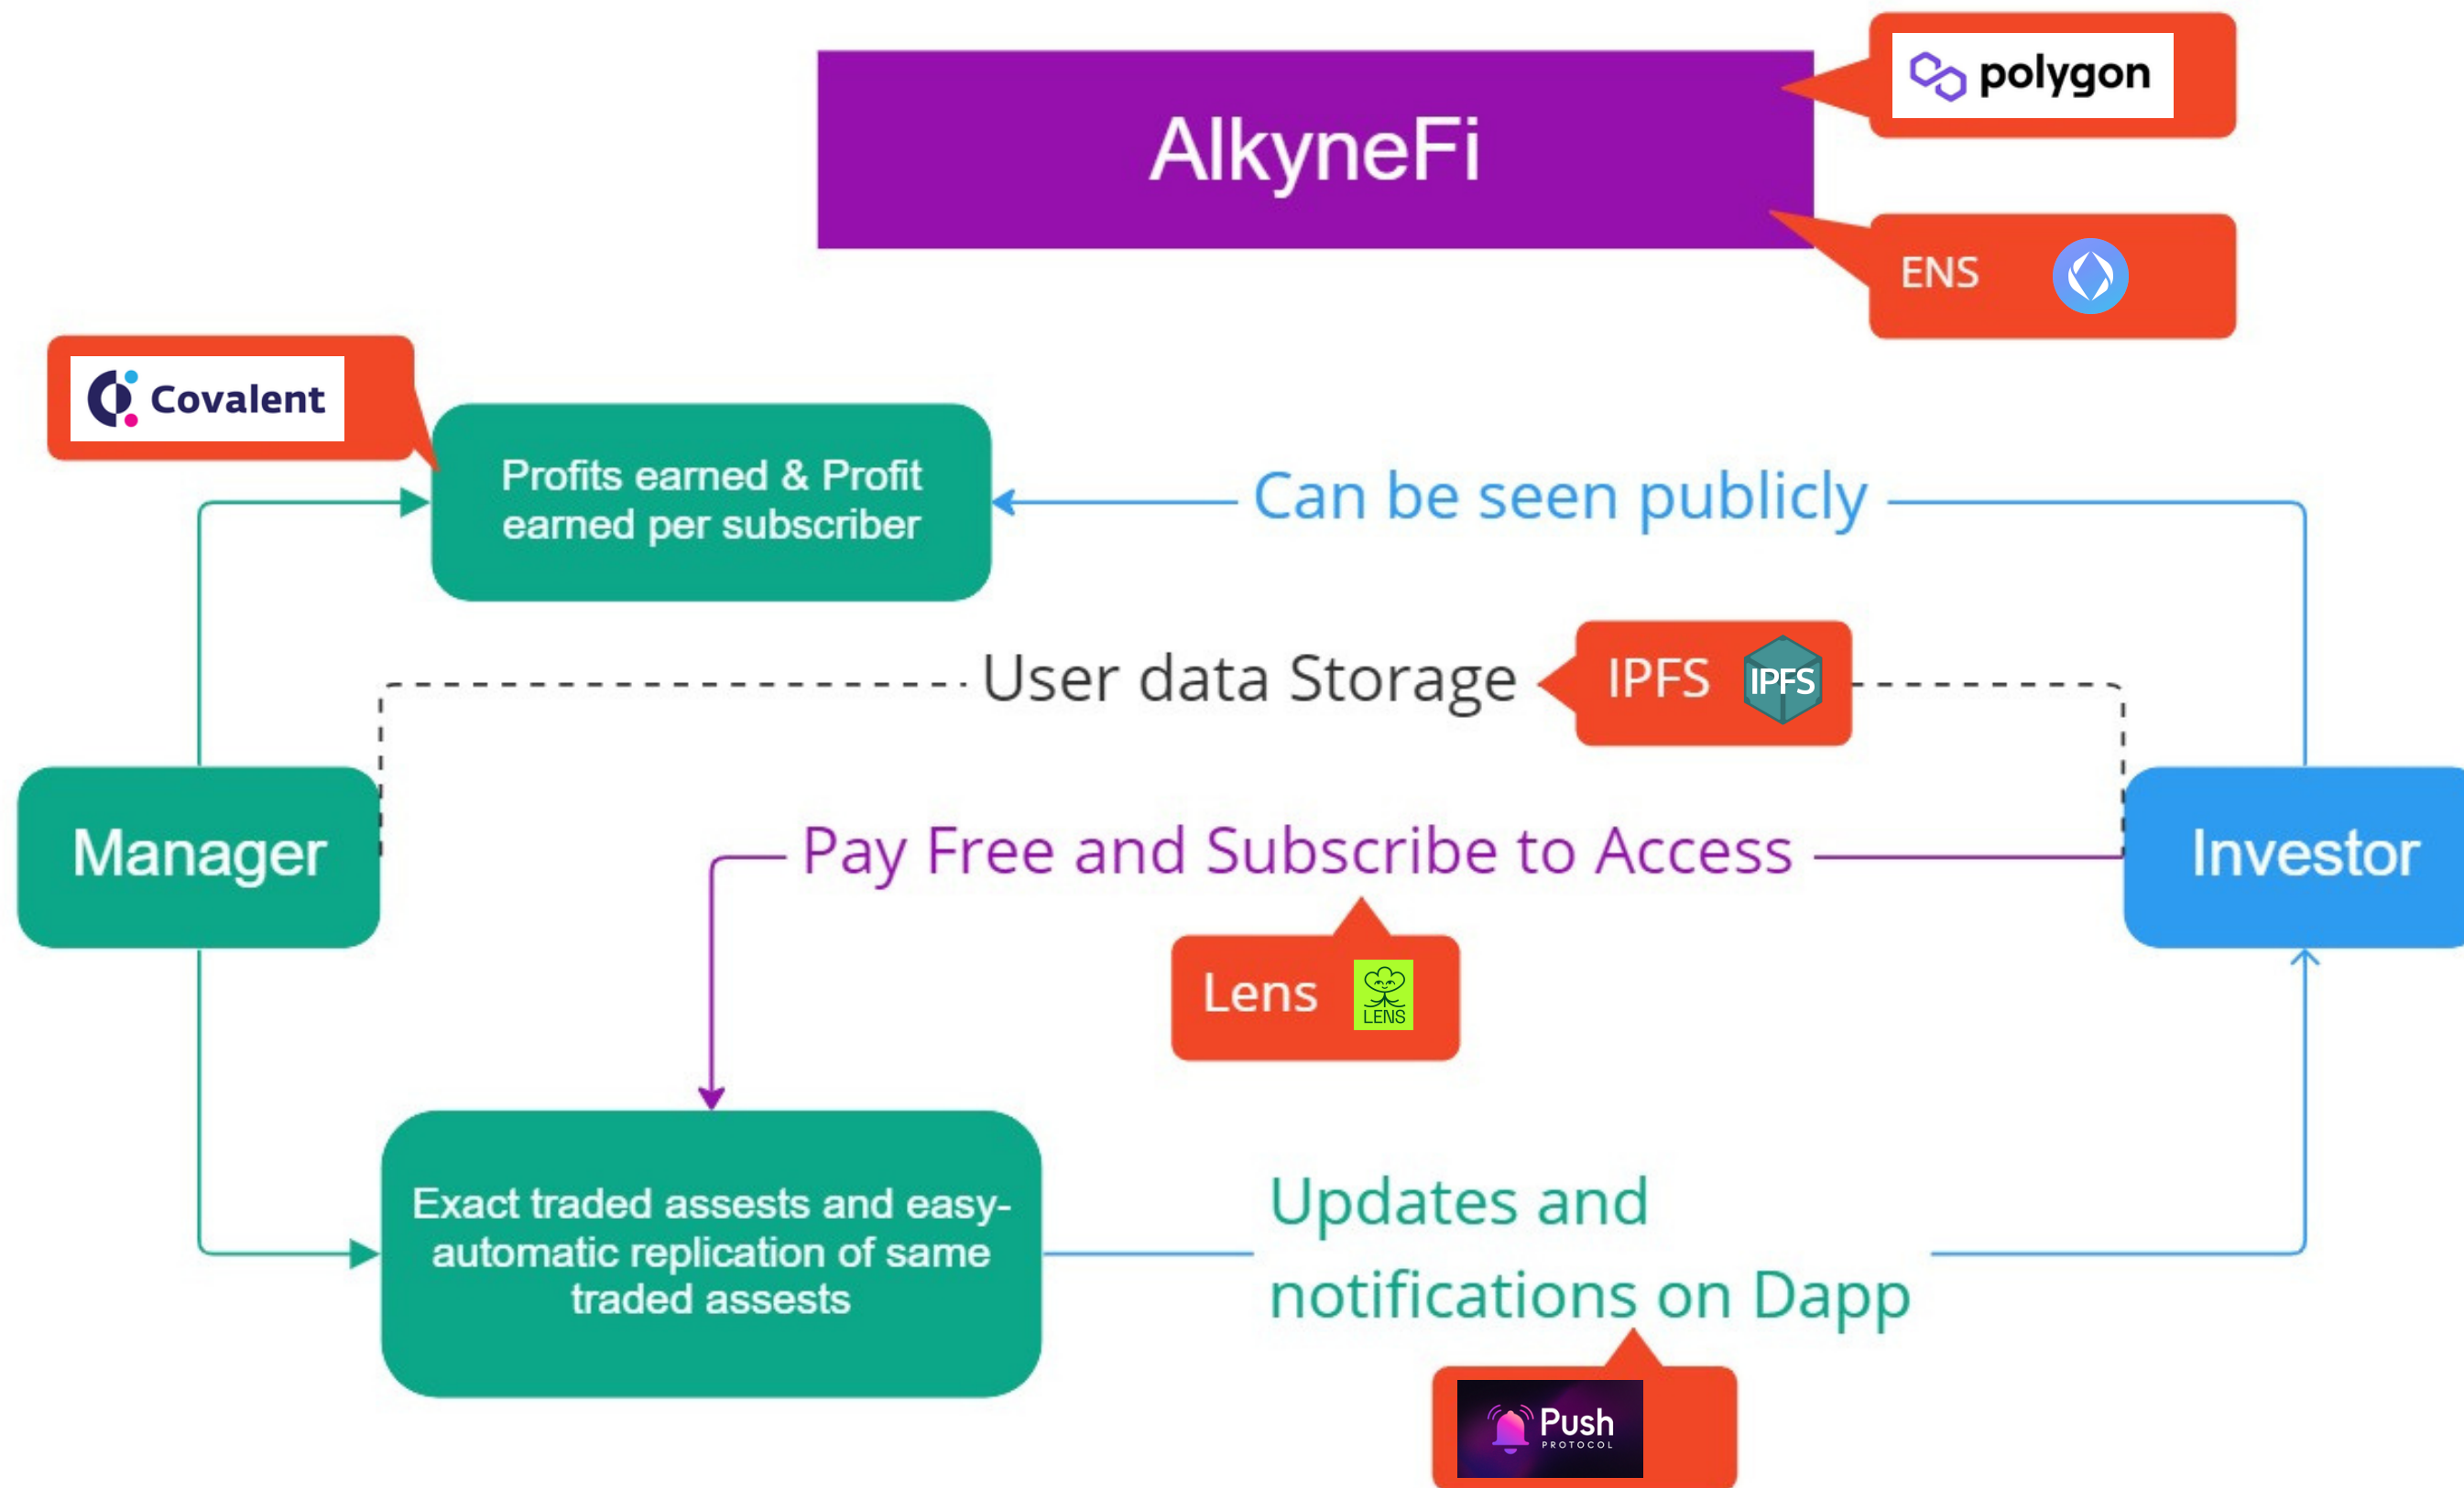

AlkynesFi is the First ever Dapp to fuse the powers of **Finance** and the **Creator Economy** under the umbrella of decentralization.

A Deeper Dive...

To make the process extremely simple, each user can view net assest profits and per subscriber profits for each creators and subsequently, for a small fee, gain access to their entire trading history of “Managers” and thus gain insights to invest in the same, which is completely automated by our smart contracts.

Sponsors

Lens allows selective membership access of assets traded / recommended by “Managers” (the “creators”) to subscribers by a “follower” model.

Hosted on ENS

Investor and Manager user data stored using IPFS

Built entirely on Polygon

Live updates and notifications using Push

Manager Assest data and records using
Covalent API
